

EXPERIMENT 1

Create a simple cloud software application for Flight Reservation System using any cloud service provider to demonstrate saas.

The screenshot shows a web browser displaying a form titled 'customer info' within an application named 'aeroplane reg'. The form contains the following fields:

- passenger name (First Name, Last Name)
- date of birth
- Email
- Gender
- Phone number (+91 81234 56789)
- Address (Address Line 1, State / Province, Postal Code, Country)
- departure date (-Select-)

The browser address bar shows the URL: https://creatorapp.zoho.in/keerthireddy4165.sse_saveetha/environment/development/aeroplane-reg/#Form:customer_info. The Windows taskbar at the bottom shows the date and time as 9:49 PM on 16/10/2023.

The screenshot shows a web browser displaying a table titled 'All Customer Infos' within the same application. The table has columns for passenger name, Email, Gender, and Phone. A single entry is visible for 'revathi kadiyala'. A modal window is open, showing a detailed view of the customer's information.

passenger name	Email	Gender	Phone
revathi kadiyala	revathikadiyala@gmail.com	female	+91

passenger name	revathi kadiyala
Email	revathikadiyala@gmail.com
Gender	female
Phone number	+919550722033
Address	Hyderabad, htderabad, 500003, India
departure date	Choice 1
return time	09:00:00
return date	Choice 1
date of birth	09.14.2005
departing from	hyderabad
destination	tamilnadu
